The Virginia Beach SPCA Clinic requires that all outdoor cats must be presented in a humane trap, or transfer cage. They will be vaccinated against Rabies, ear-tipped and tested for FIV/FeLV infection (Those who test positive will be euthanized).

Carefully read, and ensure you understand the following before signing your name:

- The Virginia Beach SPCA Clinic uses qualified staffing and approved materials for all procedures performed. It is important for you to understand that the risk of injury or death, although extremely low, is always present, just as it is for humans who undergo surgery.

- I, acting as owner of the pet named above, hereby request and authorize Virginia Beach SPCA, through whomever veterinarians they may designate, to perform an operation for sexual sterilization of the animal named on the above portion of this form.

- I understand that as long as, in opinion of the attending veterinarian, the animal is an acceptable surgical candidate, sterilization procedures will be performed regardless of the animal’s sex, or medical condition (including pregnancy). I understand that the attending veterinarian can refuse to perform any procedure on any animal for any reason. Such refusal is the sole discretion of the attending veterinarian.

An outdoor cat “package” includes a spay/neuter surgery, an FIV/FeLV test, an ear tip and a Rabies vaccine.

- Female Outdoor Cat Package $93
- Male Outdoor Cat Package $73

(Cats of unknown gender will be charged the female price)

- Outdoor cats will not be tattooed, but will be ear tipped to the accepted standard of 3/8 inch, or 1 centimeter.

- If my cat is tested positive for either FIV/FeLV, I give consent for the staff of the VBSPCA to euthanize the named animal. Money paid for the sterilization surgery will not be reimbursed, but will be used to help to cover the cost of services that were performed on my cat.

- Because of the unknown medical history and our veterinary staff's inability to perform a thorough physical exam prior to sedation, outdoor cats are considered high risk when given anesthetics. Cardiopulmonary arrest and reactions to certain anesthetic drugs may occur. In the event that the outdoor cat described above goes into cardiac/respiratory arrest, no resuscitation procedures will be performed. The owner will be contacted and informed. Please note that if the owner is unreachable, VBSPCA’s attending veterinarian will make the most humane decision for the cat, including euthanasia.

- I understand that all animals must be picked up at the time designated by the clinic staff on the day of surgery. If I do not claim the animal, I understand that after 24 hours, the animal will be considered abandoned and the animal will be handled in accordance with policies established by VBSPCA. I understand that if I abandon my animal, I give up all ownership rights.

- I have received documentation regarding alternative options to releasing my outdoor cat.

- By signing this form, I am stating that to my knowledge, the above named animal has not bitten a human, or other animal in the past 10 days.

- I hereby release the Virginia Beach SPCA, all veterinarians, assistants, volunteers, directors, and employees from any and all claims arising out of, or connected with, the performance of this procedure or any adverse reactions from vaccinations. I agree that I have not and will not claim any right of compensation from them, or any of them, or file action by reason of such sterilization or attempted sterilization of such animal or any consequences related thereto. Owner hereby agrees to indemnify and hold Virginia Beach SPCA harmless for any damages caused during the transportation of the animal, or for any damages caused by any unforeseeable events including fire, vandalism, burglary, extreme weather, natural disasters, or acts of God.

Requested Feline Vaccines and Services

- Microchip $25
- Feline Leukemia Vaccine $18
- Rabies Vaccine (1-year) (Mandatory for Outdoor Cats)
- Feline Distemper Vaccine $18
- Ear Tip (Mandatory for Outdoor Cats)
